

Wednesday, Apr 24, 2024

Time: 3:00 - 4:00 pm

Venue: Melbourne Connect

Meeting Attendees:

- Mario Andres Munoz Acosta
- Kaifan Ouyang
- Xuheng Li
- Yuqian Xie
- Harsh Mangla

Discussion Points:

1. The proper methods for analyzing the datasets.
2. Strategies for searching Google Scholar for papers relevant to our host's research area.
3. Determination of the key variables of interest for our project.
4. Understanding the terminology specific to milking and agriculture, which is essential for our project.

Action Items:

- Each team member will review the datasets and conduct a preliminary analysis to identify initial findings.
- Create a document to annotate and clarify key terminology used in our project.
- Search for and review academic papers focused on milk production, as this is our variable of interest.

Next Steps:

- Schedule the next meeting with our supervisor, finalizing the date and time.
- Progress on the action items as outlined.
