

Lely Horizon Data Installation

Prerequisites

To begin, download the Lely Horizon application. The application icon is depicted in *Figure 1*. We recommend using a Windows operating system to ensure compatibility, as this will allow you to download datasets directly from the application. Please note that the application does not currently support downloading datasets on macOS.

Figure 1: Application icon

Downloaded data

1. Log in to Lely Horizon using your Username and Password, then click the "Sign In" button. The dashboard will appear as shown in *Figure 2*.

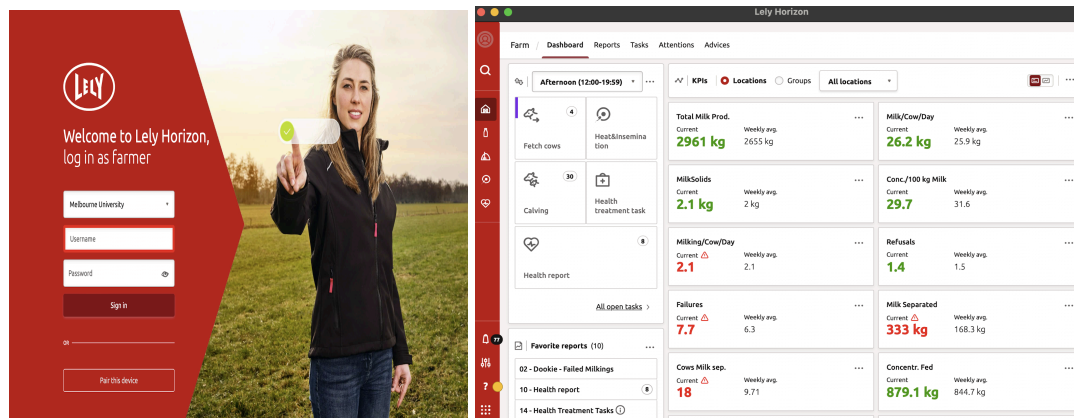

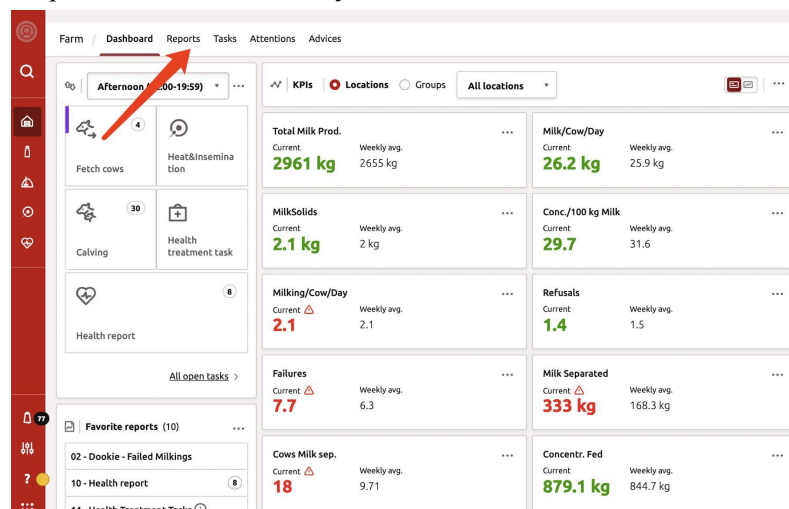

Figure 2: The login screen and dashboard

2. Click on the "Reports" tab; this is where you can download the data.

- Open any report. The data across reports is identical; the only difference is based on your selection, resulting in multiple reports with different names and tags.
- To create your own report, click on the "Duplicate" tab. This will allow you to generate a customized report.

42 - Milking - Cow Daily Production Total: 113 records

6. In the Template tab, there are **10 available templates**:

- Cow (actual)
- Cow Event (history)
- Cow Visit (history)
- Cow Daily (history)
- Device Daily (history)
- Device (actual)
- Cow Activity (history)
- Cow Milk Sampling (actual)
- Herd Daily (history)
- Cow Lactation (history)

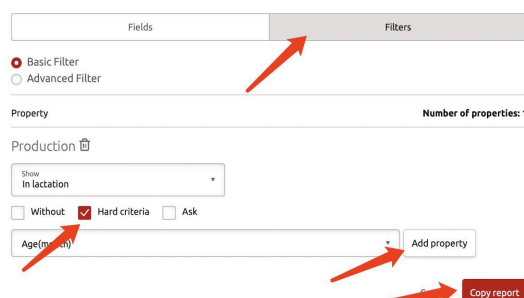

Selecting the appropriate template is crucial, as **each template contains different fields**. We will provide a [summary](#) of the fields for each template to assist users in selecting the correct template based on their needs.

7. Drag the fields you are interested in to the “Selected Fields” section.

8. **Click on the Filters tab—this step is crucial.** Typically, you should retain the Basic Filter, though you can add various properties depending on the template you've selected (Note: Different templates offer different properties to choose from). **Ensure that the "Hard Criteria" option is checked to download the dataset correctly.** Finally, click on "Copy Report."

9. To export the selected duplicate files, navigate to the files you wish to export, click on the “...” (More Options) tab, choose your desired export format (PDF, CSV, Excel, or XML), and follow the prompts to complete the export process.
